# siRNA / miRNA transfection reagent

## INTERFERin®

- + Great silencing using as little as 1 nM siRNA
- + Over 90% gene silencing in a wide variety of cells
- + Suitable for transfection miRNA and other oligonucleotides
- + Gentle mode of action for more robust data and excellent cell viability
- + Compatible with serum and antibiotics

### INTERFERin® outperforms its main competitor:

Transfections were performed on several cell lines following standard protocol.

### Efficient gene silencing:

Transfections were performed on CaSki cells following standard protocol.
