

mRNA transfection reagent:
jetMESSENGER®

Polyplus+

mRNA transfection reagent

jetMESSENGER®

- + Unmatched transfection efficiency
- + High efficiency on a wide variety of difficult to transfect cells
- + Outperform DNA transfection by switching to mRNA
- + Extremely gentle on cells
- + No risk of genome integration
- + Suited for CRISPR/Cas9 gene editing, iPS generation, stem cell differentiation and immunotherapy assays

jetMESSENGER® outperforms its main competitor:

Transfections were performed on several cell lines following standard protocol.

jetMESSENGER® shows great cell viability and is very efficient on hard-to-transfect cells compared to DNA transfection reagents:

Transfections were performed on several cell lines following standard protocol.
